## TEAMS

## STUDY TRIP PT-NOR

Ana Russo (IDL/UL) and Pedro Lind (OsloMet/ NordSTAR) established a bilateral relation funded by the European Economic Area Financial Mechanism 2014-2021 (AIClimate@EU).

AIClimate@EU will strengthen the cooperation activities of both partners, in particular establishing a network for exchange of climate data and Artificial Intelligence (AI) methods to broaden the knowledge of cascading climate events in Europe leading to possible social and economical catastrophes.

Moreover, it will ensure the dissemination of results across Europe and will foster future collaboration between the two institutions.

The second study trip from the Portuguese team to OsloMet will take place between May 29 and June 2 2024.
